

# Synergy Series Electrical System

## The Ultimate in Operational Safety and Security

The Aisle-Saver Synergy Series Electrical System offers the ultimate in operational efficiency, ease of use, as well as providing your facility with the industry standard in security and safety. Solid-state electronics, easy to read LCD Master Controller, featuring plug and play convenience, offers simple installation and programming.

- Simple control interface allows you to take immediate control and customize the system to meet your facility's specific needs for operational efficiency and security.
- Maintenance and system upgrades are simple and easy with little downtime and minimal cost.
- No limit switches or plunger to fail.
- The entire system draws only 12 volts and motors operate on just one-seventh of one horsepower.
- Soft Start technology prolongs motor life while protecting sensitive storage materials from abrupt starts and jarring motion.
- Sequential carriage movement reduces power consumption and energy costs.

## Light Carpet® Technology

Aisle-Saver's patented light carpet has provided users with reliable safety protection and security for over 15 years.

- Sensor beams are located on three inch centers, running the entire length of the carriage.
- Active/passive type of safety and security system.
- Simultaneously tracks multiple obstructions anywhere within the system to stop or prevent any movement of the carriage until everyone, and everything has left the system.

The Borroughs Corporation is dedicated to providing advanced, durable, and cost-effective storage solutions for today's leaders in industrial, manufacturing, retail, legal, business, healthcare, higher education, library, museum, and laboratory facilities and operations.

**Reliable service.  
Total satisfaction.**

Borroughs designs, engineers, and manufactures its shelving and storage solutions to maintain quality, and to respond directly to changes and new directions in the marketplace. On-site testing and design facilities allow Borroughs to work directly with customers to develop new concepts in storage that positively impact performance, productivity and cost-efficiency.

ISO 9001:2008 Certified

**Sustainable processes.  
Environmentally  
responsible.**

An environmentally responsible company, Borroughs continually looks for new and innovative ways to protect our environment. Our advanced powder coat process can reclaim paint from the atmosphere for reuse in later projects. If you are interested in taking part in our reclaimed paint program, contact your Borroughs representative and find out how you can partner with us in this environmentally responsible manufacturing process.
