

Aisle-Saver Mobile Systems: Safe, Controlled Storage by Design

The Challenge

The university of Saskatoon was undertaking renovations to improve their facility, and they needed to make the best use of the renewed space. The plan was to condense multiple laboratory storage rooms into a centralized location, making the storage more efficient, accessible, and more secure. The nature of what was being stored, lab supplies, tools, gear, and more, demanded that any mobile system have controlled speed and compacted aisle size.

The Solution

A local Stelterr dealer offered the best electronic mobile shelving system on the market: Aisle-Saver by Borroughs. A mechanical system might have had a lower up front price, but with safeguarding being a major priority, Aisle-Saver's exclusive soft-start and soft-stop technology made it the perfect fit. The system was programmed to stop well before touching the adjacent carriages, so potential damage to oversized items was eliminated. The state of the art system offers the best of touch controls, security and safety programming, and compact storage in one.

Lifetime Warranty

Mizer's industry leading warranty ensures peace of mind and guarantees a long term solution for your space.

Turn-key Installation

Quick, professional and convenient installation will have you enjoying your new space in no time.

Built with Pride

Eliminate the need for expensive service and maintenance disruptions with the highest quality construction.
